

Fristads Green
High visibility.

FRISTADS

The world's first environmentally
declared high-visibility garments.

Two sustainable collections.
Multiple options.

- 
- Fristads sustainable offer
 - EPD – Environmental Product Declaration
 - Zero waste – Recycling
 - Efficient packing and shipment
 - Fristads high-visibility clothing system
 - Profiling with company logo
 - GPLU collection
 - GSTP collection

Content.

A photograph of two men walking on a rooftop or industrial site. The man on the left has a beard and long hair tied back, wearing a black t-shirt and grey cargo pants with tools in the pockets. The man on the right has dreadlocks and is also wearing a black t-shirt and grey cargo pants, carrying a grey jacket. They are both smiling and looking towards the right. The background shows industrial structures and a clear sky.

All workers
should be able
to dress sustainably.

- Manufacturing and sales of textiles are global activities that have a major impact on our planet
- Our long-term commitments are to become the workwear industry's experts on sustainability and help our customers and suppliers to fulfil their sustainability goals
- We make it easier for consumers, purchasers and those responsible for public procurement to make conscious choices about workwear
- So far we have produced Green garments in the segments: Building & construction, Service and industry and Cold wind rain
- We plan to add Green collections in each of our product segments

reddot award 2019
winner

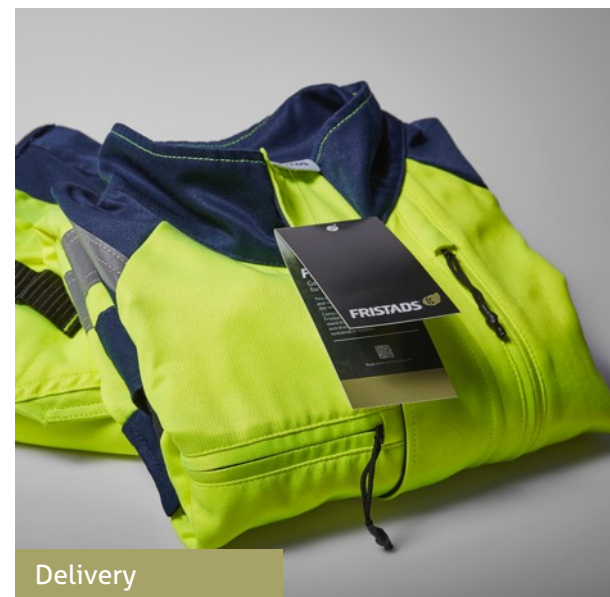

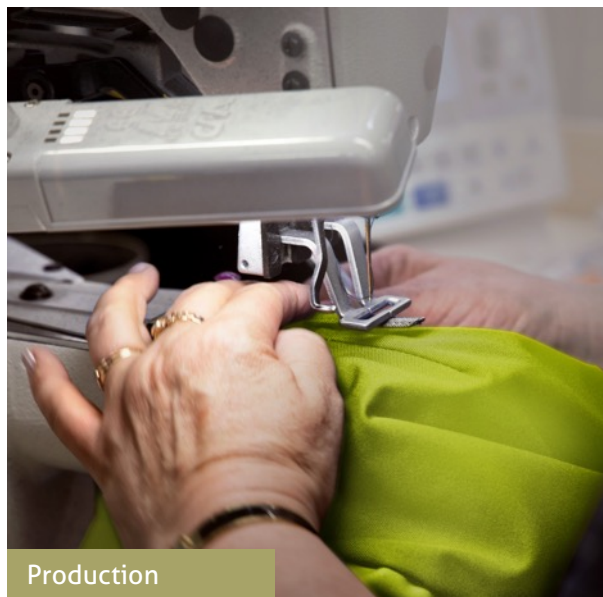

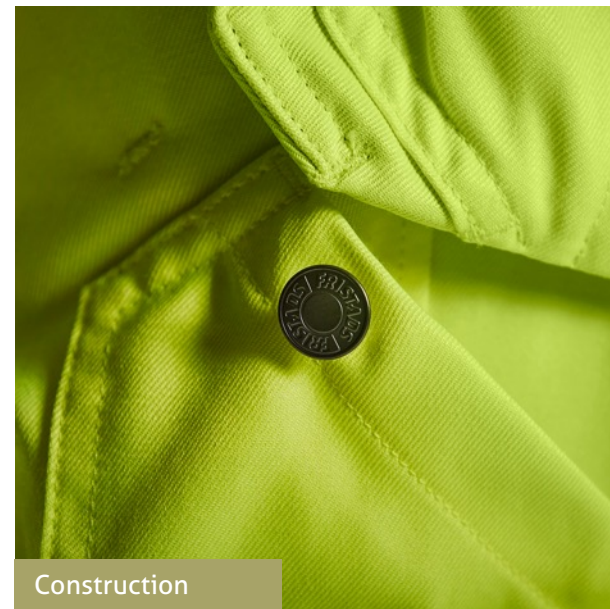

We are proud to have received
two acknowledged design
awards for our sustainability
achievement.

“A long-term, sustainable and transparent measuring tool for environmental impact”

- Fristads has made the world's first EPDs for clothing
- We are the first clothing producer in the world to introduce a new standard for measuring the total environmental impact of a garment – from choice of material to delivery of the finished garment
- A standard can be used throughout the textile industry
- The EPD measures the impact in four main areas: material, construction, production and delivery
- EPDs are already used in other product areas, but Fristads is the first to implement it for clothing

EPD –
Environmental Product Declaration.

- We reuse all waste material from production
- All surplus material is utilised on site
- Surplus material from all Fristads Green products are turned into other products like e.g. mattress filling, socks, blankets and "comfort pads".

Zero waste.

- Whenever possible we avoid the use of plastic bags, and fold the garments with a special technique
- For our high-vis garments we use a sustainable packing solution with plastic bags made of recycled polyester from recycled PET bottles
- We optimise the use of transport capacity
- All transport is by sea and road, which has significantly lower environmental impact than air transport

Efficient
packing and shipment.

- All high-visibility garments are divided into three classes – 1, 2, 3 – depending on how visible they are
- We have co-certified all our high-visibility collections
- Garments in class 1 or 2 can be combined in various ways to obtain a higher safety class
- All garments have been given a specific code, based on type of garment and classification
- The code is shown in the product information and in the CE label in the garment
- Our quick-reference guide shows all options

MATERIAL	CLASS 3	CLASS 2	CLASS 1
Fluorescent	0.8	0.5	0.14
Reflective	0.2	0.13	0.1

Trousers* (T)

Fristads High-Visibility Clothing System.
Co-certification.

- Fluorescent areas and reflective material must conform to the certification requirements of EN ISO 20471
- Ensure that the company logo does not obscure too great a proportion of the fluorescent area
- Use our table to easily find out the maximum size of transfer and embroidery to maintain the garment certification

ART. NO	SIZE	EN ISO 20471 HIVIS CLASS	REFLECTIVE AREA/M²	FLOURESCENT AREA/M²	HIVIS CO- CERTIFICATION	MAX AREA CM² FOR TRANSFER

114100	>S	3	0.21	0.81	U6	100 cm²

The GPLU and GSTP collections are designed with ample space for profiling with company logo.

Profiling.

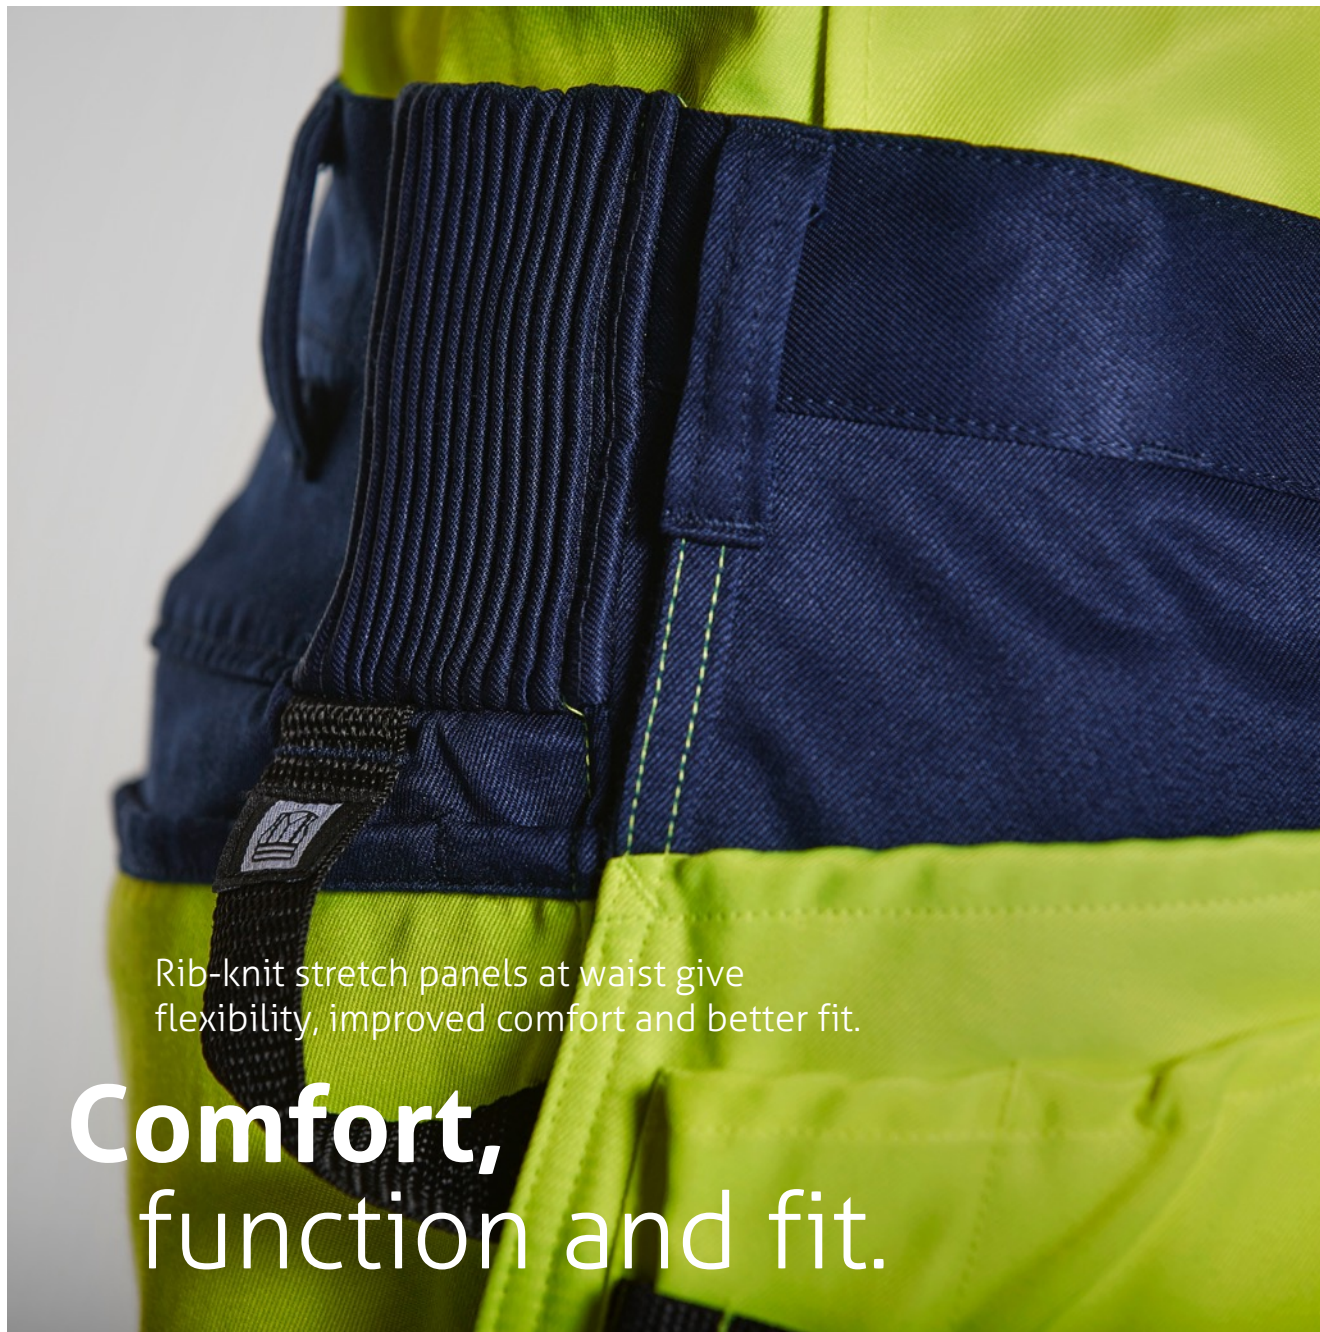

Fristads GPLU collection.

The sustainable choice for lightweight comfort.

- Wide collection with many possibilities
- Broad target group - road, building & construction, transport and logistics
- 4 colour combinations incl. new Orange/Grey
- Extra large size range
- Women's models

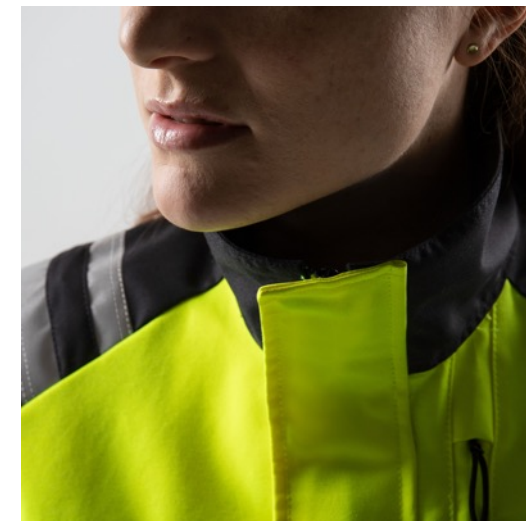

Rib-knit stretch panels at waist give flexibility, improved comfort and better fit.

**Comfort,
function and fit.**

Well-equipped with many pockets and functions to fit a variety of users.

Concealed front buttons and zippers to avoid scratching.

Leg length can be adjusted both ways. Shortening: 4 cm in C44-C70 and C146-C160. 2 cm in D84-D136. 3 cm in women's trousers. Lengthening: 5 cm in all sizes.

CORDURA®-reinforced pockets and knee pockets for extra durability.

30 used PET bottles
turn into a great pair
of trousers.

Article no 131975. 30 PET bottles, 50 cl.

We only use recycled polyester
from suppliers who can provide
certificates for traceability.

Recycled polyester
from PET bottles.

Ensures great durability and comfort. Organic cotton is grown without the use of toxic chemicals and with reduced water usage. Good for farmers, the environment and you.

The organic cotton we use is certified and can always be tracked back to the point of raw material extraction.

100%

Organic cotton.

GPLU – Green PLU.

- Recycled polyester and organic cotton
- Lightweight
- Comfortable
- Durable
- Approved for industrial laundry
- OEKO-TEX® certified
- 70% recycled polyester, 30% organic cotton
- Weight 240 g/m²

An extremely durable material used as reinforcement at exposed areas. It's lightweight, has great colour fastness and is approved for industrial laundry. 100% polyamide, 220 g/m².

All products are OEKO-TEX® certified on garment level. This means that every component in the garment, big or small, is free from harmful chemicals and safe for human use.

The PRO label states that the product is proofed for industrial laundry according to EN ISO 15797. Our GPLU garments are certified according to EN 20471 after being washed 50 times.

EN ISO 20471

EN ISO 20471. Certified high visibility garments.

Co-certified so garments can be combined in different ways to attain a higher safety class.

EN 13758-2. Certified UV protection.

RIS-3279-TOM

RIS-3279-TOM. Orange class 2 garments are certified according to British rail industry standard.

EN 14404

EN 14404. Knee pockets are certified together with knee pads 124292.

A large range of models and colours offers a perfect garment solution to meet the needs of a variety of users.
