

FRISTADS PRESENTS NEW LONG SLEEVE HIGH VIS T-SHIRT

COMFORT AND SAFETY COMBINED

Fristads offers a complete range of certified high visibility clothing for all seasons. This long sleeve T-shirt is a comfortable addition to the strong Fristads high visibility range. The comfort level and features make it a must-have for all craftsmen searching for a smooth, high vis certified T-shirt that works all year round.

The T-shirt is made of Fristads' popular knitted material TPR – 84% polyester and 16% cotton – where the cotton part is on the inside, making it soft and smooth against the skin. The stretchable reflective transfers provide full flexibility and avoid itchy inside seams. Furthermore, the T-shirt has a rib-knitted band at the neck and cuffs for even more comfort.

"This is a natural step toward further strengthening the Fristads high visibility range. More and more Fristads customers are asking for high vis garments to ensure safety in their work environments. High visibility certified garments should provide the same high level of functionality, quality and design as all other Fristads garments," says Lene Jul, Product Manager at Fristads.

Like all Fristads high-vis garments the T-shirt is approved according to the EN ISO 20471 international standard. It has safety class 2 for size XS and the highest level class 3 for sizes S-4XL. The T-shirt is available in four colour combinations and fits both men and women who need to ensure they are visible at their work site.

The T-shirt will be launched on April 1st, 2017.

Other high vis spring news include a durable and industrial laundry-tested high vis shirt approved according to EN ISO 20471 class 3 and a functional craftsman waistcoat approved according to EN ISO 20471 class 2 in Fristads' well-known PLU material with CORDURA® reinforced nail pockets.
